IN THE CLAIMS

(1)   Please rewrite Claim 61 as follows:

1   61. (Amended) A method comprising the steps of:

2   inputting invoice data associated with an import/export transaction at a first terminal coupled

3·   to a computer network, wherein the invoice data includes a product identifier identifying a product

4   to be transported in the import/export transaction;

5   transferring the invoice data from the first terminal to a server hosting a database of product

6   identifiers and tariff classification information particular to each of the product identifiers;

7   matching the product identifier identifying the product to the product identifiers in the

8   database; and

9   outputting a data record in response to the matching step, wherein the data record includes

10   tariff classification information associated with the product identifier identifying the product;

11   importing a product into a country using the data record.

REMARKS

Claims 1-62 are pending in the Application.

Claims 1-62 stand rejected.

Changes to the claims are shown in red-line format in the attached Appendix.

I.   CLAIM OBJECTIONS

Claim 61 is objected to because of an informality. In response, Applicants have amended claim 61 to repair the informality.
